Art Unit: 3727

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in China on 3/21/03. It is noted, however, that applicant has not filed a certified copy of the Chinese application as required by 35 U.S.C. 119(b).
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3, 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Crouch '638 in view of Ho '923 and Gramegna '795.

Applicant's invention appears to be directed to an improvement to a strap handle for luggage with includes a bellows attachment which covers the articulated portion of the strap connection. Crouch is considered to show the basic strap connection which includes an end extension at each end of the strap with an elongated opening to receive a bolt passing through a cap and securing the strap to the luggage as shown at d. To have included a post in the cap to receive a threaded screws for ease on construction would have been obvious in view of such teaching by Ho at 34. To have included a bellows member to cover the attachment would have been obvious in view of such teaching by Gramegna at 16. To have formed the bellows member of a shape which complements the strap handle would also have been obvious. Such a shape would inherently be elliptical or rectangular along with the strap. Note that Ho teaches the use of a plurality of screws to secure the caps.

Art Unit: 3727

3. Claims 2 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chen, Knapp, Waterer, Hammesfahr, Chen, Gates, Carpeles, Crouch, Smoot, Ho, Martin, Goldberg, Marks and Aumasson show other handle connections.

5. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a).
